## **CSM Worldwide Expands Top Management With Senior Company Veterans**

MOUNTAINSIDE, N.J. (January 15, 2007) – CSM Worldwide, a world leader in the engineering, design, development and manufacture of industrial pollution control and emission abatement equipment solutions, is pleased to announce two key promotions: Michael Torstrup, from General Manager to President and Chief Operating Officer; and Atul Shah, from Director of Engineering to Chief Executive Officer.

“Michael and Atul have both played vital roles in the growth of CSM Worldwide for more than 15 years, which will ensure a smooth transition to the benefit of CSM employees, customers and stockholders alike,” stated Thomas Otchy, who served as President and CEO since 1988 and has assumed the positions of Chairman of the Board of Directors and Chief Financial Officer.

Mr. Torstrup and Mr. Shah joined CSM Worldwide within a year of each other – Mr. Torstrup as an engineer in 1991; Mr. Shah as a design engineer in 1990. Both went on to apply their broad experience in design engineering, mechanical engineering, electrical engineering and process control engineering to advance steadily within the company to senior engineering management positions. Mr. Torstrup advanced to Director of Engineering before becoming General Manager. Mr. Shah advanced to Project Manager, then Director of Engineering.

Most recently, Mr. Torstrup directed all engineers, core technologies and new product development for CSM air pollution control systems installed around the world. Mr. Shah directed multiple projects for the development and installation of air pollution control systems at industrial manufacturing facilities and major chemical processing plants located in the United States, Europe, South America, Taiwan and Korea.

### **About CSM Worldwide**

CSM Worldwide, Inc., headquartered in Mountainside, N.J., is a full-service supplier of technologically advanced air pollution control and emission abatement solutions to industry worldwide. Established in 1898, CSM has advanced into the 21<sup>st</sup> Century recognized as the global leader in the design, engineering, manufacture, installation and maintenance of the most effective custom systems for destroying harmful oxides of nitrogen, volatile organic compounds, and a wide range of hazardous air pollutants prior to emission into the atmosphere. CSM offers its customers a complete strategic solution to their particular air pollution control challenges, based on its expert knowledge of the best technologies and regulatory mandates. The CSM portfolio of solutions includes catalytic oxidizer systems, thermal oxidizer systems, selective catalyst reduction systems, carbon adsorption systems, VOC concentrator systems, and energy recovery systems.
